

Connect to the best in clinical chest medicine. Anytime, anyplace.

Choose *CHEST* to connect busy health-care professionals to the content they need — whenever and wherever they need it most.

CHEST delivers the best in peer-reviewed, original research, systematic reviews, and comprehensive literature reviews to a diverse audience of medical professionals specializing in pulmonology, critical care, sleep medicine, and thoracic surgery. The internists, family physicians, nurses, respiratory therapists, and home-care professionals who read *CHEST* are committed to providing the best possible care to their patients with chest-related diseases. *CHEST* is also home to the American College of Chest Physicians' highly regarded clinical practice guidelines and consensus statements.

CHEST is available in print, online, on the mobile web, and as an app for iPhone®, iPad®, and iPod touch®. All mobile usage is traced and included in COUNTER reports.

With access to *CHEST*, your patrons can—

- **Search** the entire *CHEST* archive (from 1935) and *CHEST* Books, or limit results to a single publication.
- **Read *CHEST* Online First** for earliest access to research weeks before publication.
- **Access guidelines and consensus statements** from anywhere on the site, plus quick links to guidelines in the National Guideline Clearinghouse.
- **Search, browse, and read *CHEST* on the go** with your mobile device.
- **Browse *CHEST*'s three collections** to find relevant topics, special selections, and online exclusives in chest medicine.
- **View recommended readings** in context for all articles from *CHEST*, *CHEST* Books, PubMed, and National Guideline Clearinghouse.
- **Receive personalized content**, such as e-mail alerts and RSS feeds, about new topics and special sections in subject areas of interest.
- **Listen to monthly podcasts from *CHEST***, on the site, or in iTunes®, for context and commentary on the latest developments in the field.
- **Check out** the Ultrasound Corner video series, a presentation of key concepts of general critical care ultrasonography with real cases and images.
