AUDIENCE RESPONSE INSTRUCTIONS

I have attached a sample ARS slides, the first example is the basic question and answer; when preparing your PowerPoint please use this format, and highlight the correct answer by changing the font color. The additional slides are examples are of how the slides will function.

There are several ways to use the ARS system in your presentation. You can choose to do a Pre and Post Test, to see what the audience does or doesn't know, and what they have learned. You can also use it as a discussion tool to ask what the people in the audience would do in a certain case. It can also be used as a quizzing tool. An ARS question can be asked at any time during your presentation.

Insert Question into Title Box

Click to Add Text

Insert Answers into Text Box

- Please use the Title and Content Layout
- Write your Question in the 1st Title Box
- Write your Answers in the 2nd Box using bullet points, either numerically (1,2,3,4) or Alphabetically (A,B,C,D)
- Please indicate the correct answer, by highlighting the text a *different color*.

AUDIENCE RESPONSE SYSTEM

Once your slides are turned in, the Audience Response Team will convert your slides to work for the system. The next set of slides will show how the slides will appear during the presentation in the room.

1. The Question will appear

2. A 10 second timer will appear after you have read the question and answer choices

3. Once the timer has finished, a graph will appear showing how the audience voted.

4. After the graph has appeared the correct answer will be indicated (A correct answer is optional)

AUDIENCE RESPONSE EXAMPLE

IN THE 2011 OSCARS, WHO WAS NOMINATED FOR BEST ACTRESS?
