

Name of Grant: CHEST Foundation Young Investigator Research Grant

Application Deadline: April 4, 2022

Amount of Grant: \$30,000 1-year grant

Research Proposal Focus

The purpose of this grant is to enable promising investigators to encourage and promote quality research in chest medicine to begin their career as independent research faculty.

Funds are to be used to facilitate basic or applied clinical research by a young investigator in the field of chest medicine. Research into any aspect of chest medicine will be considered. Projects must demonstrate how it will have a positive impact on the lung health of a community.
