

CHEST has 22 special interest groups called NetWorks. Each year, the NetWork Steering Committees host NetWork Featured Lectures and Open Forums. These sessions include a 30-minute featured lecture, presented by an expert in your field, and a 30-minute open meeting where you can meet and network with leadership and other members of your NetWork. Come learn about the NetWorks that interest you most, meet the leadership, and learn how to get involved! [NetWork Featured Lecture and Open Forum Interest Form](#)
